Re: IHSAA Softballs

Date: April 24, 2007

It has been brought to our attention that Wilson Sporting Goods has distributed softballs to at least one Indiana sporting good company that displays the IHSAA logo and the COR (not to exceed .47) but not the compression (375 lbs. maximum). NFHS rules specify that both the COR and compression be displayed on regulation softballs. Wilson has verified that the compression meets NFHS specifications.

As a result the balls displaying the IHSAA logo and the COR will be legal for use for the 2006-07 season only.
